Thanks Sara!

I'm hoping you will be taking the lead in this afternoon's discussion?

Here is input for Sara Ayres on the Air Toxics NCI. I picked the best settlement cases, explained the CAL, mentioned the AK Steel collaboration, and complained about OIAI and state approval.

Your input is welcome,

All,

Attached are notes from the meeting yesterday for those unable to attend. As noted, we had a discussion of some of the information we're going to need to present for the Executive Board briefing on November 13<sup>th</sup>. Specifically, we asked for the following information to be provided by **COB Friday October 26<sup>th</sup>**:

# Non-Responsive

- Obstacles/challenges – we listed the changes to the OIAI policy as a potential challenge at the last briefing, examples of where this has impacted your work in FY18 would be especially welcome

# Non-Responsive

Although Regions may have different amounts of information to share, if we could get something from each region on at least the first 4 topics, that would be very helpful. I've also attached a recently run ICIS report with the Air Toxics inspections and info requests currently in the system for your information. Please let me know if you have questions or need more information. Thanks.

Sara Ayres
